Summer School 2011

Innate and Adaptive Immune System: Tool and Challenge for Gene Therapy

14.-15. September 2011
CMMC Research Building Cologne
University of Cologne

Dear all,

It is our pleasure to announce the

3rd Summer School of the German Society for Gene Therapy (DG-GT e.V.)

on the topic:

Innate and Adaptive Immune System: Tool and Challenge for Gene Therapy

It will take place on September, 14th - 15th, 2011 at the Centre for Molecular Medicine of the University of Cologne. Co-organizers of this year's Summer School are the Research Priority Program 1230 of the DFG "Mechanisms of Gene Vector Entry and Persistence", the Collaborative Research Center 670 „Cell-Autonomous Immunities“, the Centre for Molecular Medicine Cologne (CMMC) as well as the EU consortium "ATTRACT".

A number of national and international recognized experts will introduce the basics of vector technology and of the immune system. This is followed by a series of talks on immunotherapy. The immune system can also limit the efficiency of gene therapy. We will discuss examples for this as well as possible solutions in the final two sessions.

The Summer School is dedicated, but not limited, to MD and PhD students and post-doctoral fellows. Hence, all persons who would like to participate are cordially invited. Please, support this event by informing your lab members. Participation in the Summer School is free of charge. For organizational reasons, we kindly ask for an obliging registration by mailing to hildegard.buening@uk-koeln.de till August 15th, 2011.

With kind regards,
Your Organizing Committee

Hildegard Büning
Hinrich Abken
Christopher Baum
Wolfgang Uckert
Martin Krönke

Fax: 030/9406-3306
E-mail: wuckert@mdc-berlin.de

Beirat

Prof. Dr. Toni Cathomen, Hannover
(Genom-Modifizierung)
Prof. Dr. Klaus Cichutek, Langen
(Regulatorisches und Lentivirale Vektoren)
Prof. Dr. Boris Fehse, Hamburg
(Zelltherapie)
Prof. Dr. Christof von Kalle, Heidelberg
(Molekulares Monitoring)
Prof. Dr. Stefan Kochanek, Ulm
(Virale Vektoren)
Prof. Dr. Dorothee v. Laer, Innsbruck
(Infektiologie)
PD Dr. Dirk Nettelbeck, Heidelberg
(Onkolytische Viren)
Prof. Dr. Ernst Wagner, München
(Physikochemische Vektoren)

Präsidenten ex officio

Prof. Dr. Hengge, Düsseldorf
Prof. Dr. Christopher Baum, Hannover
Prof. Dr. Michael Hallek, Köln
